

# 4 $\mu$ Production

## Production Technologies for micro systems Empowering Europe to the $\mu$ century

### Production4 $\mu$ Summer School

**Total duration:** 18 hours

**Organized by:** GREP (Ascamm Foundation and University of Girona)

**Activity Coordinator:** prof. Dr. Quim de Ciurana / eng. Roberto Gava

**Venue:** Escola Politècnica Superior (University of Girona, Spain)

**Dates:** June 30<sup>th</sup> to 2<sup>nd</sup> July

**Time:** 9 am to 5 pm

**Places:** 50

**Price:** Free for students, 120 € for companies and professionals (cost sharing)

**Teaching Staff:** Ascamm Foundation and invited technicians

During the last 4 years, the European consortium Production4 $\mu$  has developed a new production process technology for positioning Europe ahead of micro components manufacturing. Now, it's time to share the knowledge generated with you.

So we are proud to invite you to the **Production4 $\mu$  Summer School**. Addressed to engineer students, companies and professionals from optics and micro manufacturing sectors, the course will offer an overview of the newest high precision technologies for the production of mini and micro optical components.

The course is coordinated by the GREP, a research group in engineering of product, process and production formed by the University of Girona (Spain) and Ascamm Foundation (Barcelona, Spain).
